Culling Road Vent Shaft

Product design-development, manufacture, and installation of feature cladding to a Jubilee Line Extension Project Vent Shaft in Bermondsey, consisting of Grade 316 stainless steel support frames carrying random pre-patinated copper panels forming a series of different height vertical and overhanging bands around the circumference of the shaft, the pre-patination being designed to allow subsequent natural weathering once in location.

Client:	London Underground Limited
Architect:	Ian Ritchie: Architects
Contractor:	AOKI Soletanche JV/O'Rourke
