**PRODUCT SPECIFICATION (REV.02)**

**JULY 2008**

**ENTECH SERIES 1455 PASSAGEWAY CEILING AND SERVICES MANAGEMENT SYSTEM**, consisting of pressformed flat soffit panels from 1.5 mm zinc coated mild steel, with a rear galvanised mild steel flanged-channel metal framework to support the panels, light units, and services, the framework being fixed with 12 mm diameter threaded rod into chemical anchors drilled into the existing tunnel soffit, or suspended from the structure above, all visible external surfaces of the panels being finished in Entech high quality polyester powdercoat RAL 9016X 30% gloss White, or to an alternative finish as specified, central panels in the soffit assembly being fixed or hinged as required and being plain unperforated, or perforated with a rear sound absorptive infill as the Entech Series 1453:PA-CX Acoustic Cladding System, outer panels in the soffit assembly being either plain unperforated or being composite panels incorporating a central non-metallic zone to provide a radio-transparent screen to leaky-feeder cabling above, all being to detailed design and approval.

**ENTECH SERIES 1455:A CEILING AND CMS SYSTEM**, as described above but from 2 mm aluminium.
